

Al

~~container means for containing inflation fluid under~~
pressure, said container means having at least one openable
portion for releasing inflation fluid to flow out of said
container means;

B

first output means connected with said container for
releasing inflation fluid from said inflator at a relatively
high rate over a relatively short period of time; and

second output means connected with said container
for releasing inflation fluid from said inflator at a
relatively low rate for a relatively long period of time.

REMARKS

By the present amendment, claims 18-22 are added to the
subject application to provide Applicants with a proper scope
of coverage.

Respectfully submitted,

Thomas L. Tarolli
